CONNECT
ROOM SIGNS

Our Connect room signs give you a feature-rich, cost-effective room management solution that doesn't require the AxisTV CMS.

- Book, start, extend, end or cancel meetings
- See room status instantly with availability lights
- Customize backgrounds, fonts, colors and more
- Show room number and room resource icons
- Report resource issues on screen
- Use analytics to track room usage, availability requests and room resource issues
- Easily surface mount out of the box
- Powered via POE network switches, optional POE injectors, or by included DC power supplies

Connect signs show schedules from your own calendar app outside each room. You'll see space availability at a glance with side lights that shine green when the room is open and red when it's not.

Connect's interactive screen lets you book space right at the room sign, and those reservations are immediately shared with your calendar application to avoid double-bookings. The signs default to showing bookings for today, but there's a handy dropdown calendar to let you quickly select another date. You also have the option of requiring a PIN to make bookings at the sign.
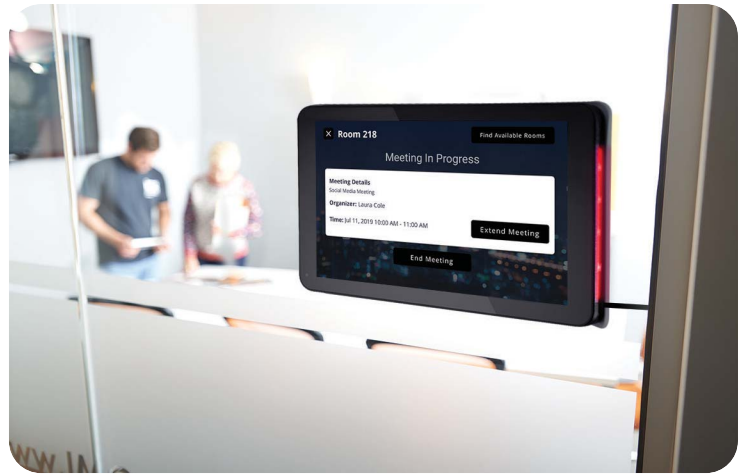

You can start, extend or end a meeting on Connect. If a room is booked, you can see other available rooms at the press of a button. You can also cancel a walk-up reservation at the sign, but bookings made in your reservation system are protected from erroneous cancellations.

Connect room signs show data from popular event management systems, including:

E⊠ Exchange   Office 365   EMS   Google   CollegeNET
                 an accruent company   Calendar

Connect signs can also show your room name and icons for technology available in the space. And, if there's a problem with a resource in the room, you can report the issue right at the screen.

If you don't want to limit yourself to just schedules, Connect lets you show images alongside appointments with its image viewer. You can upload multiple images or map a single internet image to the image area via the content management system.
