

Replace printed schedules with sleek, affordable electronic paper signs that are always up to date.

- Economical choice for displaying room schedules
- Wireless and battery-powered
- Display schedules for meeting rooms, classrooms, training rooms and more
- Show workspace reservations for office hoteling
- Save time, money and waste by replacing printed schedules

Our electronic paper signs (EPS) are the most cost-effective option to display current schedules outside your shared spaces – an inexpensive, wireless and battery-operated solution from Visix.

These compact displays can be placed virtually anywhere because they don't require any cabling. Easily mount them outside meeting rooms, classrooms, training rooms or any other space you reserve. You can also attach them to desks or cubicles used for workspace hoteling.

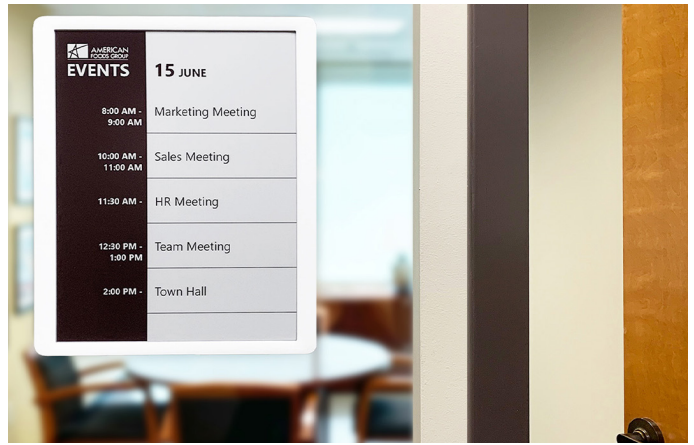

Paper-white signs have a bright display background with low reflectivity for high readability, and allow for both black and red colors on screen. The room signs are updated wirelessly via RF communication designed to minimize battery usage. A sign's batteries are only activated when information changes, which allows batteries to last up to three years or 10,000 updates.

Calendar changes are delivered to EPS room signs throughout the day without any user intervention, so you no longer have to manage outdated paper schedules.

EPS room signs show data from most event management systems, including:

An EPS system can be used in conjunction with other Visix room signs and digital signage products, or as a completely stand-alone solution.

How it works

Our Conference application pulls together schedules from a variety of calendar programs, taking care of integration with the scheduling system you're already using. It supports multiple event management systems – and multiple instances of those systems – in the same installation, so it can easily support all the systems across an organization.

EPS Management software applies schedule data to selected templates and pushes updates to EPS room signs via RF transmitters. The software can also be used to check the status of room signs, check battery power levels and to deploy additional room signs.

EPS signs come with a stylish frames and faceplates, and custom designs are also available. Custom faceplates can include raised room numbers, braille, different material finishes and your organization's logo.

MeetingMinder™ Paper-White EPS 125

Display size: 9.78 x 7.8 inches elnk paper-white bistable EDP
Resolution: 1304 x 984 (4:3 aspect ratio), 180 degrees viewing angle
Orientation: Portrait or Landscape
Dimensions: 8.7w x 10.9h x .47d inches
Weight: 16 oz.
Power: 1 ea. 4800 mAh lithium polymer (or LiPo) battery
Mounting: Detachable mounting adapter with screw holes
Faceplate: Dark grey or white plastic frame included; custom available

MeetingMinder™ Paper-White EPS 74

Display size: 6.4 x 3.85 inches elnk paper-white bistable EDP
Resolution: 640 x 348 (16:9 aspect ratio)
Orientation: Portrait or Landscape
Dimensions: 7.15w x 4.8h x 0.75d inches
Weight: 10 oz.
Power: 6 ea. CR2450 batteries
Mounting: Detachable mounting adapter with screw holes
Faceplate: Black plastic frame included; custom faceplates available

EPS RF Transmitter

Dimensions: 6.2w x 4.5l x 1.4h inches
Power: 1 x 10/100Mbit Ethernet port, Industry standard IEEE 802.3af PoE specification
1 x DC power input (optional)
RF Communication: IEEC 802.15.4a compliant
RF Frequency: 915MHz ISM Band 2-way wireless
LEDs: Power, connection and Ethernet activity
Mounting: Integrated Wall/Ceiling Mount

Conference and EPS Management applications require a PC running Windows Server 2016 or better and 8GB memory.
